

Student Handout #3 (continued)

Using the information on the map and the region names you found, fill in the information below the timeline. You might not need to write in every space. In some spaces, you will write more than one answer. For example, in the time period around 10,000 BCE, where did agriculture develop and what crops emerged? Write that information in the table beneath 10,000 BCE.

	10,000 BCE	9,000	8,000	7,000	6,000	5,000	4,000	3,000	2,000	1,000 BCE
Regions where agriculture developed around this time										
Agricultural products or crops that emerged during this time										

Using the map and the chart, answer the following questions. You may still work with a partner. Be ready to share and explain!
